

triple 4

## A shift into a new dimension for IT solutions

### About us

Triple4 helps gain insight into your company's strengths and weaknesses, making sure your IT objectives align with that of your business. We tailor specific end-to-end IT solutions for your environment. Using a unique skill set we deliver IT management, support and monitoring services for your business.

#### Who We Are

##### Our Expertise

We focus on delivering complete IT management and support for all layers of your IT system including core infrastructure, endpoints and storage. Offering bespoke solutions for pain points affecting systems, process, people and strategy.

We pride ourselves on customer service and guarantee specialised one-on-one IT management. This means that your IT team has the opportunity to get to know both you and your business allowing us to go the extra mile for your company.

#### What We Do

##### Consulting and IT Services

Consulting is in our DNA. We take a specialised approach to our client's IT requirements by understanding their pain points, whether it is systems, processes or strategies. We can develop a solution from conception through to implementation and beyond.

Our Service Streams:

Care 4 Service is a bespoke offering where Triple4 will design a complete end-to-end solution to look after any IT service that is causing your environment to not deliver what is required to keep the business moving forward.

Care 4 Network is an end-to-end management and service solution stream that takes control of your network at every layer. From the local area user networks in your offices, right through to your wide area VPN's, storage networks and Internet and Cloud connections.

Care 4 Data is a complete end-to-end discussion and workstream around a business' most prized asset, its Business Intellectual Property and Data. A business is nothing without its data, and its data is irreplaceable.

Care 4 Asset is a workstream within Triple4, managing all assets be it hardware and/or software within an organization. Ensuring all assets are utilized, managed and within an active lifecycle.

We provide service delivery and project management, service coordination and monthly reporting, to ensure your IT environment is functioning and supported.

### Who We Work With

#### **Our Partners**

When it comes to brand partnerships our clients have high quality standards, and so do we.

#### **Network Partners**

When it comes to connectivity we have chosen network partners who adhere to the highest industry standard, whether it be network, hardware security or wide area networks. Our partners include Ruckus, Juniper Networks, Hewlett Packard and Dell.

#### **Hardware Partners**

Our hardware partners are an intrinsic part of any IT environment, that's why we partner with Hewlett Packard, Dell and Fujitsu to provide you with the tools you need.

#### **Software Partners**

Our software partners have been chosen with the quality and reliability associated with their support foundation in mind. We partner with Microsoft, Mimecast, Google Cloud, Veeam and VMware to cater to all our clients' needs.
